## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-8, 11 are rejected under 35 U.S.C. 102(b) as being anticipated by WO Document NZ97/42438 (Hansen).

The Hansen reference discloses a valve comprising a valve seat 5a, a valve stem 7, a deformable portion 7a, additional biasing means/spring 19, a support plate (plate which spring and diaphragm are supported by, see Figure 3), and a support frame 1.

Claims 1-5, 7, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Browne.

The Browne reference discloses a valve comprising a valve seat H, a valve stem E with a head and a deformable portion J, additional biasing means (the spring, see Figure 11), a support plate (plate which end of spring opposite valve is seated on, see Figure 11), and a support frame 312.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Browne in view of WO Document NZ97/42438 (Hansen).

The Browne reference discloses a valve as discussed supra, but does not disclose a support post for the spring. However, the Hansen reference discloses a support post for the spring for additional support for the spring. It would have been obvious to employ a support post for the spring of the Browne valve in view of Hansen for additional support for the spring

***Allowable Subject Matter***

Claims 9, 10, 12, and 13 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
